

Introducing Absolute Biotech

Uniting multiple antibody-centric brands into a single organization, Absolute Biotech offers the full breadth of antibody-related products, services and expertise for research, diagnostic and therapeutic applications. Our mission is to serve as “antibody curators” for customers worldwide, treating each antibody like a work of art to deliver unique and absolutely defined reagents that empower scientists.

Our Offering

Absolute Biotech offers a wide selection of off-the-shelf antibodies and kits, as well as custom antibody services. We specialize in adding value to existing antibodies through annotation, validation, sequencing, engineering and recombinant manufacturing.

Reagents

- Primary & Secondary Antibodies
- ELISA & Assay Kits
- IHC Antibodies & Reagents
- Cell Lines & Proteins
- Flow Cytometry Buffers

Services

- Antibody Sequencing
- Antibody Engineering
- Antibody Expression
- IgY Antibody Production

-  **Recombinant Expertise**
21,000+ recombinant antibody production runs
-  **Antibody Engineering**
180+ different formats manufactured
-  **IHC Leaders**
15,000+ antibodies validated for immunohistochemistry
-  **Extensive Catalog**
1 million+ reagents available

Our Brands

We are experts in antibody engineering and recombinant antibody technology.

We are leaders in IHC validation, offering a comprehensive catalog of antibodies, proteins and ELISAs.

We make unique laboratory-made research tools easily accessible to the global scientific community.

We offer antibodies, reagents, kits and custom IgY services at the cutting edge of the research life sciences market.

We develop high quality antibody and flow cytometry reagents according to ISO 9001 guidelines.

We are specialists in anti-peptide and antigen affinity purified goat polyclonal antibodies.
